ORDERWISE®

Fast, Powerful Business Software

ORDERWISE MOBILE WMS FOR ANDROID
More warehouse control, at an even faster pace

INTRODUCING ORDERWISE MOBILE WMS FOR ANDROID

Are manual, paper-based processes slowing your operations? Or are you looking to boost business productivity even further with advanced warehouse technology? If so, the latest OrderWise Mobile WMS for Android app is the perfect tool for your workforce.

Experts in technology

OrderWise Mobile WMS for Android, combined with Zebra's unmatched mobile device hardware, will truly revolutionise your warehouse processes. With over 80 years of combined experience, OrderWise and Zebra are proven experts at delivering powerful warehouse management technology for real-world application.

Feature-rich kit

The TC52 handheld device (HHT) operates using the comprehensive Android 8 Oreo OS and the TC21 HHT benefits from Android 10 OS, which are both typically used on Android smartphones.

Both devices come complete with all the accessories you need to streamline your tasks and increase productivity, throughout the warehouse and beyond. Integrating flawlessly with OrderWise systems, simply tap, scan, and reap the benefits of a warehouse that functions like clockwork.

THE NEXT LEAP FORWARD FOR YOUR WAREHOUSE

Whatever your industry, the latest OrderWise Mobile WMS app for Android provides high-level functionality to increase efficiency and innovate your warehouse operations.

A new level of pick performance

Wirelessly synchronising in real-time to a picker's handheld device, you can eliminate manual rekeying and paper-based processes from your operations. Automatically create, assign and amalgamate picks and other stock tasks, prioritising urgent orders and abiding to courier cut off times for enhanced picking efficiency. Give your pickers improved visibility of notifications and work assignments to keep your operation running smoothly without having to intervene.

Pick multiple orders at once, quickly process returns or ship items directly in just a few taps of the 5-inch HD touchscreen, cutting out time-consuming administration. Reduce time spent dealing with costly returns to free up pickers on the ground, and with accurate picking, eliminate stock discrepancies and double handling of goods to keep your customers happy around the clock.

With all these abilities and more, you can advance your warehouse performance from day one.

The best tech for your team

The light yet durable devices are waterproof and dust-proof, can handle drops to concrete, work in the cold and heat, and have screens visible even in bright sunlight.

The latest version of OrderWise Mobile WMS is a native Android application, ensuring your business technology can stay current. Moreover, avoid unnecessary warehouse downtime with a device and app that work together seamlessly, including easy to apply updates to your mobile technology. With greater control of user and device accessibility, you can on-board your teams smoothly, through increasingly intuitive software that puts its easy user-interface first.

Goods in, in a flash

Provide an efficient, accurate and flexible way for your staff to book goods into your warehouse. With the Mobile Goods In module, staff can scan received stock in against the relevant purchase or container order for fast and accurate receipt and guided put away of goods.

Navigate your operation

Direct your team using the best walk routes and onscreen prompts to put a stop to unnecessary delays. Using integrated navigation, pickers will get to their destinations faster, enhancing productivity in the warehouse and creating a streamlined operation.

See all your data in real-time

Our live data transfers will provide instant updates, allowing you to maximise your warehouse efficiency with paperless and wireless automation. Your team can utilise an even faster platform, eliminating synchronisation delays and storing and processing data more quickly than ever before.

Fast, accurate scanning

Using the 1D and 2D barcode-scanning technology, receive information against purchase orders instantly for fast and accurate receipt of goods, with expiry dates, batch and serial numbers captured. Instantly flag stock issues and replenishments, and perform precise stock takes with minimal disruption.

Understand your workforce

Gain the ability to monitor picker performance and send statistics back to your central OrderWise system for analysis. Using the latest Android HHT, achieve greater control over the way your warehouse operates, ensuring powerful systems that work for you and your team.

Ditch the downtime

Each handset includes Zebra's Device Diagnostics app, where you can further eliminate needless device downtime. You can choose up to (5400 mAh) 14 hours of power for devices which is ideal for long or double shifts, and fast-charging capabilities mean you can get an extra two hours work time from as little as 15 minutes of charging. For added peace of mind, on top of OrderWise, Mobility Extensions (Mx) from Zebra offers over a hundred features to improve Android security, manageability and more. Enhanced data capture support and business-class Wi-Fi will ensure your pickers receive a superior wireless experience without interruption to their productivity.

WHY CHOOSE THE LATEST ANDROID HHT?

The Zebra TC21 and TC52 have advanced features to set your operations above and beyond the rest. See what the TC52 has in store for your business:

Game-changing technology

Stay ahead of the game by investing in the latest devices equipped with the Android platform - future-proof your technology investment with built-in support for future Android releases

Lightning synchronisation

Never miss a deadline with live data transfer and keep up to speed with instant synchronisation of tasks

ORDERWISE®

Unstoppable software, full traceability and continuously synced
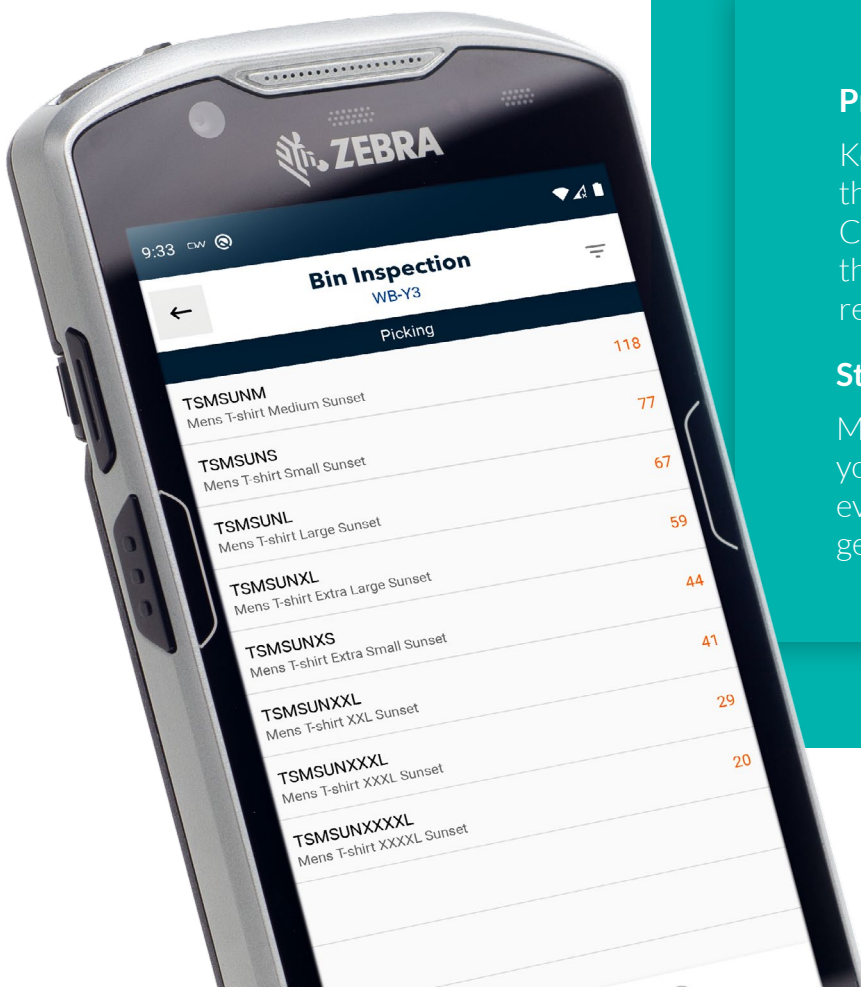

Precise performance

Keep your devices performing at their best using PowerPrecision Console – an easy-to-read dashboard that identifies aging batteries to be removed from circulation

Stress-free implementation

Minimal setup is required for your new system. We take care of everything, so all you need to do is get scanning!

Technology at your fingertips

Easily view and interact with jobs using a large 5-inch HD advanced touchscreen, built with best-in-class outdoor readability for inside and outside working

ZEBRA

Immediate data capture

No matter how far or wide, capture 1D and 2D barcodes in a flash using advanced scanning technology that doesn't need to be aligned to the barcode

Stay connected

Keep working wherever you're positioned on-site using Wi-Fi boosted with 2x2 Multiple-User Multiple Input Multiple Output (MU-MIMO) technology, and easily connect with Bluetooth, GPC and NFC for effortless networking

Compact design

Effortlessly carry and operate this lightweight device using one hand for maximum efficiency, and create dedicated soft keys on the display to access frequently used features and applications in one touch

Photo, video and audio ready

Provide evidence of your services at the click of a button with an integrated 13mp camera, and make video calls at the scene with a 5mp front-facing camera, three microphones, high-volume speakers and noise-cancellation technology

Freedom to perform

Perform your duties without fear of damage with rugged and resilient hardware that has an IP67 sealing classification ensuring your devices are water, dust, temperature and accident-proof. The Corning® Gorilla® Glass touch panel and imager window bring maximum scratch-resistance and shatter-proofing to two of the most vulnerable device features

Unbeatable power

Stay powered up all shift with an impressive 14 hours of battery power, and swap batteries without the disruption of shutting down devices using Warm Swap Mode

Extra protection

Have the added peace of mind that your HHTs will perform at every turn with Zebra's outstanding OneCare cover options

Make it yours

Choose from a range of accessories to benefit from additional flexibility with carrying and mounting options

Get started on your journey
