

Thermal patient ID wristbands

Improve patient safety with bar coded patient ID wristbands

Where positive identification meets safe, efficient patient care.

Thermal Patient ID Wristbands

Critical patient safety and regulatory guidelines

- **Joint Commission International Patient Safety Goals:**
 - Goal #1:** Identify patients correctly
 - Goal #2:** Improve effective communication
 - Goal #3:** Ensure correct-site, correct-procedure, correct-patient surgery.
- **American Health Association (AHA):** Prevent the chance of lost or transferred data.
- **The European Commission, The national patient safety agency (NPSA) in the UK, la Haute autorité de Santé (HAS) in France, il Ministero della Salute in Italy:** Patient Safety regulations.
- **Five Rights of Medication Administration:** Ensure the right patient, drug, dose, route, and time.

Patented PermaPrint® technology maximizes print performance

- **Best Print Quality:** Heat is transferred directly and evenly along the wristband, resulting in consistent heat energy, high-quality print and images, and superior bar code scanning
- **Resistance to Solvents and Harsh Environments:** Laboratory tests have proven that PDC's wristbands are more resistant to light, moisture, solvents and liquids for baths/showers
- **Printer-Friendly:** While traditional thermal ID products need higher temperatures and can transfer varnish to the print head, the PermaPrint® surface helps to extend the life of your printer, even with high-speed prints

Advantages

- Combine our wristbands with the brand new **PDC desktop direct thermal printer**, to produce crisp, accurate bar code imprints on demand
- Specially designed for durability and to resist moisture, alcohol, and hand sanitizer to preserve patient data and bar codes
- Quick and easy to print and apply to patients
- Patented PermaPrint® surface provides the best imprint quality, maximum resistance to solvents, and seamless printing
- Soft, smooth, and lightweight material for patient comfort
- Constructed of strong, latex free, non-irritating material
- Antimicrobial additive protects wristband surface against non-pathogenic bacteria

Efficiency. Accuracy. Patient Safety.

Positive patient identification is the foundation of patient safety. From patient admission and throughout the hospital continuum of care, accurately matching the patient to the correct medication, specimen, test, and procedure is critical to positive outcomes. PDC's thermal wristbands use bar code technology to help prevent human errors to improve patient safety and enhance workflow.

⊕ EASY AND VERSATILE

Easy loading and replacement of rolls. Choose the wristband size you need from PDC's wide range of thermal bands to fit all sizes of patients, from the smallest newborn babies to the largest adults.

⊕ QUICK & DURABLE

Produce on demand barcoded patient ID in a blink of an eye. Get crisp, fast and durable imprints that maintain effectiveness throughout the patient's full stay.

⊕ CONVENIENT & COMFORTABLE

Easy for caregivers to apply on patients. Light and smooth against the patient's skin.

⊕ EFFICIENT & RELIABLE

Consistently accurate scan reliability improves workflow efficiency, optimizes patient safety and provides convenience for caregivers who can focus more time on caring for their patient.

Scanband *Satin*

- Satin-Like Material is super soft and comfortable to the most sensitive skin
- Combines ultra comfort with high performance and safety
- Withstands even the harshest hospital environments
- Anti-wrinkle material makes it easy to read barcodes and other identifiers
- Durable non-transferable adhesive closure
- High-quality dark & sharp print that doesn't fade
- Easy to print and apply to patients in seconds
- Water-resistant and tamper-evident

CompuBand

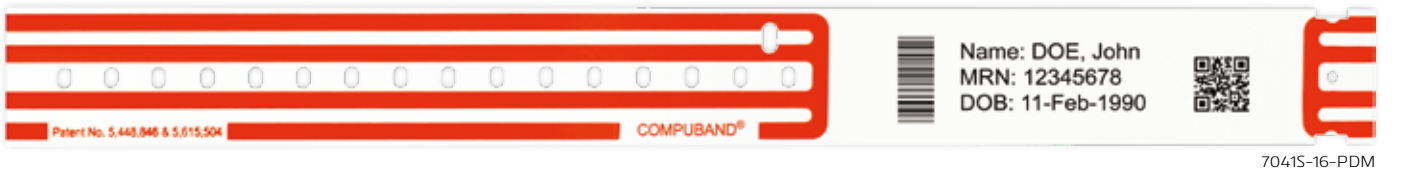

- The surface provides best imprint quality, maximum resistance to solvents and seamless printing
- Prints in seconds through direct thermal printers, which activate a heat-sensitive thermal material
- Durable, strong, lightweight and comfortable
- CompuBand features a soft material. Ideal for patients with sensitive skin, including babies and the elderly
- Provides high-quality bar code for scanning and accurate patient ID
- Tamperproof, secure snap closure

Thermal infant

Infant direct thermal wristbands provide positive patient identification for newborns using bar code technology to help ensure patient safety.

- The surface provides best imprint quality, maximum resistance to solvents and seamless printing
- Provides a flat surface for best bar code scanning results, eliminating curvature issues
- Improved direct thermal surface protects print & bar code from water, soap and hand sanitizer
- Easy to apply adhesive closure ensures safety and security

ACCESSORIES

Tendercare mother-infant system

- Exclusive, patent-pending 2-part & 4-part wristband system positively identifies baby with mother
- The surface provides best imprint quality, maximum resistance to solvents and seamless printing
- Provides fast, accurate, on-demand printing with a thermal printer
- Supports text, linear and 2D bar codes, photo ID and graphics
- Helps increase lifespan of print head
- Ensures crisp, clear bar codes for easy scannability
- Ultra-soft material for delicate newborn skin
- Tamper-resistant adhesive closure
- Offered in plain white, plus a variety of cute, baby-friendly designs
